Comment:

This is so wrong. The whole purpose of the copyright office is to protect the rights of the citizens. That is the whole purpose of filing for a copyright. Legal grounds for protection. It sounds to me that there is a group of people out there that are wanting something for nothing. We are trusting in the government to protect our rights. This is becoming harder and harder to do. You are our government, we have paid our fees and followed your instructions to the letter. Now you do what we have hired you to do and don't compromise for a bunch of loudmouth, greedy people! It doesn't belong to them!
